PROFESSIONAL SUMMARY

I'm a front-end developer with 3+ years of experience building dashboards, panels, and interactive web applications. I enjoy taking on new challenges, picking up new technologies, and turning Figma designs into user-friendly, production-ready interfaces. I care about writing clean, maintainable code and collaborating closely with teams from design to product to deliver high-quality, reliable products.

TECHNICAL EXPERTISE

Frameworks & Core:	Next.js (App Router/Pages), React 19, React (Vite), TypeScript, JavaScript (ES2023), Feature-Sliced Design
State & Data Flow:	React Query (TanStack), Zustand, Redux Toolkit, Axios, Custom Hooks Architecture, Orval API Gen
Forms & Validation:	React Hook Form, Formik, Zod, Yup
Testing & Quality:	Jest, React Testing Library
UI/UX & Display:	Tailwind CSS, Material UI (MUI), AG Grid, React Table, ECharts, Chart.js, Framer Motion, Figma Integration
Accessibility & i18n:	Accessibility (a11y) — ARIA Attributes, Keyboard Navigation; Internationalization (i18n)
Architecture & Tools:	NX (Monorepo), Git, GitFlow Branching Strategies, Husky, Jenkins CI/CD, ESLint, Prettier, Storybook

PROFESSIONAL EXPERIENCE

Front-End Developer · [Admoon](#)

NOV 2023 – APR 2026 • Tehran, Iran

Google Ads agency platform with a dedicated client panel connected to the Google Ads API, including fraud/click-fraud detection.

Featured Production Links: [Admoon Landing](#) | [Admoon Panel](#) | [International Landing](#) | [International Panel](#) | [Ciara Landing](#) | [Ciara Panel](#)

- Data Tables and Charts:** Built and maintained a large number of server-driven data tables with bulk actions, inline edit, delete, and row selection, alongside a wide range of analytics charts across the client panel.
- Performance & INP Tuning:** Engineered virtualized rendering for complex analytical charts with AG Grid and ECharts and tuned Interaction to Next Paint via React transitions, cutting INP from ~320ms to <180ms and improving load time by 45%.
- SEO & Organic Growth:** Optimized the SSR layer and Core Web Vitals across landing pages, lifting Lighthouse performance from 62 to 98+ and contributing to page-1 rankings for target keywords.
- Technical Quality & Contract Safety:** Enforced code standards through code reviews and wrote unit/integration tests (Jest, React Testing Library) to cover key edge cases; built a type-safe API pipeline with Orval and validated critical entry points with strict Zod schemas, reducing integration-related debugging by 20%.
- Complex Form Architecture:** Built multi-step, conditional forms using React Hook Form and Zod schema validation, migrating from Formik and Yup after they proved difficult to maintain for multi-step flows and conditional field logic.
- Developer Workflow:** Followed a GitFlow-based PR review process within an NX monorepo, with Husky pre-commit checks and Jenkins CI/CD automating quality gates and deployments to the develop branch.

Front-End Developer · [Noora Azma](#)

June 2023 – Nov 2023 • Tehran, Iran

ERP software company

Featured Production Links: [Noora Azma](#)

- ERP Module Development:** Built UI modules for an ERP system using Next.js and Tailwind CSS, learning and applying Feature-Sliced Design structure and clean-coding principles under senior guidance.
- Resource Scheduling Feature:** Contributed to a workforce-scheduling feature with live conflict detection, helping reduce manual scheduling errors.

EDUCATION

Bachelor of Science in Computer Software Engineering

2020 – Mar 2024

Islamic Azad University, Central Tehran Branch
